# OUR PURPOSE:

To honor God in all we do by:  
Caring for People  
Continuously Improving  
Growing Profitably

Focusing on specialty pipe, fittings, shapes, automated/engineered valves, kit packages, industrial MRO, and government sales. Eastern Power Technologies, Inc. (Power Tech) is committed to supplying your order with policies and procedures that are part of our ISO 9001:2015 Certified Quality Management System. We strive to maintain our quality program to ensure we are providing the level of service expected and required by our customers. Every process was created with our customers in mind, from specific material handling programs to material etching and labeling. Quality is what we do.

Power Tech started as a specialty division of Eastern Industrial Supplies, Inc. in 2005 when it became clear that the company needed a special team dedicated to the power generation field and the higher standards that are associated with it. Seven years later in 2012, Power Technologies needed an office and warehouse location of their own. It became a branch of Eastern Industrial Supplies and operated in that capacity for 2 years. In 2014, Eastern Power Technologies became a separate legal entity and company from Eastern Industrial Supplies, Inc.

We are a certified Woman Business Enterprise (WBE) and Woman Owned Small Business (WOSB) by the Women's Business Enterprise National Council (WBENC). What this WBE certification means to our customers is that all the due diligence and heavy lifting has been done to ensure that Kim Miller (President and CEO) is a woman who not only owns a majority of the business but is also an active participant in the day to day operations.
